I am incredibly thankful to you for your continuous help and support, and I am now a student at Chengdu University.

At university, I am participating in many different activities. I'm the class ambassador and have participated in art competitions, the Golden Apple Creativity Contest, and other creative competitions. ....I hope that I can become a talented and able person and someday do the same as you and help support people like me.

....I will continue to study hard. I believe that only this way can I pay back all of the dear people ~ the very best people ~ who helped me out. Thank you again for your support and help.

I wish you good health and success! CH - 2012 January 19"
